Task 1

Details

Kirti

23 | Delhi | Working professional

Education - B.A Eng.hons

Occupation - Costumer support executive

Workplace - Concentrix , Gurugram

Experience - 2+yr

Motivation

- Wants a convenient and hassle-free way to pay for daily travel.
- Prefers quick payments that do not interrupt her journey.
- Wants a reliable payment option that works across different transport modes.
- Values security for both her card and payment information.
- Likes having multiple payment options depending on the situation.
- Wants better visibility and control over her transport expenses.

Goals

- Use one card across different transport modes.
- Reach destinations easily and faster.
- Track her transport spending clearly.
- Have an alternative payment option when the balance is insufficient.
- Get refund/money recovery if the card is lost or stolen.
- Use the same payment solution while travelling to different cities.

About

Kirti is a 23-year-old working professional based in Gurugram. She works as a Customer Support Executive at Concentrix, where she handles customer emails and replies to queries. She has completed her B.A. English Honours from Delhi University (DU) and has 2 years of work experience.

Pain Points

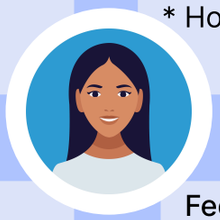

- Long queues at Metro and Bus ticket counters.
- Unclear ticket fares before booking.
- Physical tokens or Ticket can get lost or misplaced.
- Uses different payment methods for different transport modes.
- Sometimes faces insufficient balance while travelling.
- Has to visit a top-up machine to check/ recharge her metro card.
- Unsure whether UPI will work in different cities or regions.
- Local auto-rickshaw drivers may not accept UPI, so she keeps cash as backup.
- No single place to clearly track transport-wise spending.
- Concerned about losing or getting her card stolen and wants money recovery/refund.

Says

* I want a single card for different modes of transport.
* I often forget to recharge my Metro card.
* Top-up failures and server issues make traveling frustrating.
* I want to track my travel expenses easily.
* A virtual card would be helpful if I lose my physical card.

Thinks

* Can I travel without worrying about my card balance?
* Why do I need different payment methods for different transport modes?
* What if money gets deducted but my card balance does not update?
* Can I use one payment solution across different cities?
* How can I recover my money if I lose my card?

Does

* Uses a Metro card for metro travel.
* Uses Paytm to pay for e-auto rides.
* Recharges her Metro card when the balance is low.
* Checks her card balance and transaction details.
* Keeps alternative payment options available when needed.

Feels

* Frustrated when top-up transactions fail.
* Worried when money is deducted but the balance does not update.
* Inconvenienced by managing different payment methods.
* Concerned about losing her physical card.
* Relieved when payments are quick and reliable.

Pains

* Repeated Metro card top-ups.
* Slow servers and unsuccessful recharge transactions.
* Different payment methods for different transport modes.
* Risk of losing the physical card.
* Difficulty tracking all travel expenses in one place.

Gains

* One card for multiple transport modes.
* Automatic fare deduction from a linked bank account.
* Quick, reliable and hassle-free payments.
* Easy access to travel and transaction history.
* A virtual card as a backup.
* Better control over travel expenses.

Details

Himanshu

28 | Delhi | Working professional

Education - B.A Eng.hons ,
Diploma in Data Analyst

Occupation - Data Analyst

Workplace - Gurugram

Experience - 2+yr

Motivation

- Wants a convenient and hassle-free daily commute.
- Prefers automatic fare deduction directly from the bank account.
- Wants one card for multiple modes of transport.
- Wants to save time by avoiding repeated top-ups.
- Wants to track travel expenses easily.
- Wants a virtual card as a backup if the physical card is lost.
- Wants a smooth and reliable payment experience.

Goals

- Use one card for Metro, e-auto and other supported transport services.
- Link the card directly to a bank account.
- Avoid manual recharging and top-ups.
- Make quick and successful payments without server issues.
- Check travel expenses and transaction history in one place.
- Access a virtual card through the phone.
- Book Metro and Bus tickets quickly through an app.
- View ticket fares clearly before booking.

About

Himanshu is a 29-year-old graduate from Delhi, currently working as a Data Analyst in Gurgaon. He is passionate about his career and chose the analytical field because he enjoys working with and analyzing data. Before pursuing a Data Analytics course, he researched various institutes and online platforms, carefully checking reviews and feedback to make an informed decision.

Pain Points

- Difficulty tracking card payments and ticket expenses in one place.
- Finding and booking tickets quickly can be difficult during rush hours.
- Confusion while selecting routes, stations and boarding points.
- Metro card sometimes stops working properly.
- Frequently forgets to recharge the Metro card.
- Top-up transactions fail due to slow servers.
- Money gets deducted, but the card balance does not update.
- Needs different payment methods for Metro and e-auto.
- Cannot use the physical card if it gets lost.
- Travel fares sometimes increase unexpectedly.

SAYS

* “I want to book Metro and Bus tickets through one app.”
* “I want to see the fare before booking.”
* “I prefer quick and convenient digital payments.”
* “I want easy access to my booked tickets.”

THINKS

* Wants a simple and quick ticket-booking experience.
* Prefers clear route, station and fare information.
* Expects ticket confirmation immediately after payment.
* Wants to manage bookings and payments in one place.
* Values a reliable and convenient travel experience.

DOES

* Checks routes and fares before travelling.
* Looks for convenient ticket-booking options.
* Uses digital payments where available.
* Checks booking and payment details.
* Plans his journey according to available transport options.

FEELS

* Frustrated by long queues at ticket counters.
* Stressed when running late.
* Confused by unclear route or fare information.
* Worried when payment or ticket confirmation is delayed.
* Satisfied when booking is quick and smooth.

Pains

* Repeated Metro card top-ups.
* Slow servers and unsuccessful recharge transactions.
* Different payment methods for different transport modes.
* Risk of losing the physical card.
* Difficulty tracking all travel expenses in one place.

GAINS

* Quick Metro and Bus ticket booking in one app.
* Clear route and fare details.
* Digital tickets easily accessible on the phone.
* Reliable payments and instant ticket confirmation.
* Booking history in one place.
* Convenient journey planning and time savings.

Problem Statement

Daily commuters face challenges in managing transport payments, recharging travel cards, and booking Metro and Bus tickets quickly. Using different payment methods and dealing with top-up failures can make daily travel inconvenient. UniGo aims to simplify the travel experience by bringing transport payments, ticket booking, and expense tracking together in one app.

Research Finding

- Users want a convenient and hassle-free daily commute.
- Repeated Metro card top-ups can be frustrating.
- Payment failures and delayed balance updates create inconvenience.
- Users prefer quick and easy Metro and Bus ticket booking.
- Clear route and fare information is important before booking.
- Users want to manage travel payments and ticket bookings in one place.
- Users want to track their travel expenses easily.
- Users value secure payment options and a backup if their physical card is lost.

Design Opportunity

- Provide easy card balance and top-up management.
- Offer quick Metro and Bus ticket booking.
- Show clear route and fare information.
- Provide digital tickets that are easy to access.
- Combine booking history and travel expenses in one place.
